Single-port Gigabit Non-standard PoE Injector

(ONV-PSE1301AC-60)

OVERVIEW

PoE injector is also called Power over Ethernet midspan equipment. Centralized PoE injector are also called PoE power supply modules. ONV-PSE1301AC-60 is an unmanaged PoE injector independently developed by ONV. It has 1*10/100/1000M PoE port, can support non-standard PoE power supply. single-port PoE power of 60W. It can provide stable, safe and reliable power output and data transmission for terminals such as PTZ network cameras, high-power wireless APs, high-power network multimedia speakers, and high-power POE lighting through network cables.

Unmanaged mode, plug and play, no need to configure, easy to use. PoE injector provide simple, economical, high-performance, intelligent Ethernet PoE power supply and data communication solutions. With the characteristics of simple use, convenient installation, superior performance and high cost performance, it is an ideal choice for customers to improve project quality. Under the condition that the remote power cannot be provided, expand the traditional power line network, reduce the use of power lines, and effectively reduce the construction cost and maintenance cost.

FEATURE
